Congratulations on choosing Nels Cline's Signature Distortion Pedal "GOO"!

Thick, focused, creamy, GOO Oozes Tone, has plenty of volume and plenty of gain with loads of singing sustain, a superb tube amp like feel, along with great dynamics and touch sensitivity.

GOO's JACKS:

1. **Input Jack:** Right Side
2. **Output Jack:** Left Side
3. **Power Input:** Back Side

GOO's CONTROLS:

1. **VISCOSITY:** Controls the Drive Level
2. **SHININESS:** Passive Tone Control
3. **VOLUME:** Controls the Output Volume
4. **MODE SWITCH (internal):** There's a dip switch inside GOO, located on the upper right side of the circuit board that lets you engage 2 different modes.
 - **MODE 1:** Nels' favorite - dark and thick tone with lots of volume.
 - **MODE 2:** Engages a brighter mode, linear response from the volume control.

POWER REQUIREMENTS: "GOO" requires 9VDC Center – Negative Power Supply. Please use a professional quality power adapter for optimal performance and safety.

WARRANTY AND SUPPORT: GOO carries a Lifetime, Non-Transferable, Limited Warranty that covers defects due to parts and labor and begins at the date of purchase. GOO has been extensively Tour and Studio Tested and is Artist Approved for professional use on tour and in studio worldwide.

WARNING: Using an incorrect power adapter can lead to damage and will void the warranty. Any attempt to open the pedal to modify or attempt a repair voids the warranty. Please contact us directly through the support form on www.toneconcepts.com.
